

ANTARA GLOBAL

Complete Backend Architecture & System Design

Ecosystem Platform — Not Just a Website

Recommended Backend Architecture

Technology Stack

Layer	Recommendation
Backend Framework	Node.js (NestJS) or Laravel 12
Database	PostgreSQL
Cache	Redis
Authentication	JWT + Refresh Tokens + OAuth (Google, LinkedIn)
Storage	AWS S3 / Cloudflare R2
Queue	BullMQ / RabbitMQ
Search	Elasticsearch / Meilisearch
API	REST + GraphQL (optional)
Admin Panel	React Admin / Filament (Laravel)

Deployment: Docker + AWS / DigitalOcean

User Roles

- Super Admin
- Admin
- Advisor
- Mentor
- Investor
- Partner
- Founder
- MSME Owner
- CA/CS/Legal Professional
- Guest

RBAC (Role Based Access Control) — Permissions should be dynamic instead of hardcoded.

PHASE 1 (MVP)

Core Foundation — Authentication, Profiles, Assessments, Advisory, Documents, Admin, Notifications

Module 1: Authentication & User Management

Objective

Provide secure authentication, authorization, and user profile management for all platform users with dynamic RBAC.

Features

- Register
- Login
- OTP Verification
- Email Verification
- Forgot Password
- Social Login (Google, LinkedIn)
- MFA
- Device Management
- Session Management

Database Tables

- Users
 - Roles
 - Permissions
 - Role Permissions
 - User Sessions
 - OTP Logs
-

Module 2: Founder / Startup Profile

Objective

Manage founder and startup profiles with verification and document uploads.

Features

- Profile completion % tracker
- KYC verification
- Startup details (industry, sector, problem, solution)
- Funding stage and valuation
- Team members management
- LinkedIn profile integration
- PAN / GST uploads

Database Tables

- Founder
- Education
- Experience
- Skills
- Startup
- Business Stage
- Funding Stage
- Documents

Additional Notes

Includes Startup Module fields: Revenue, Traction, Customers, Cap Table, Current/Previous Funding.

Module 3: MSME Profile

Objective

Manage MSME business profiles with financial health and compliance tracking.

Features

- Business details and industry classification
- GST and turnover tracking
- Employee count and export status
- Financial health assessment
- Compliance status tracking

Database Tables

- Business Details
- Industry
- GST

- Turnover
 - Employees
 - Export Status
 - Financial Health
 - Compliance Status
-

Module 4: Venture Readiness Assessment

Objective

Assess investment readiness using structured checklists and auto-scoring.

Features

- Checklist: Business Plan, Pitch Deck, Financial Model, Legal, Cap Table, Due Diligence, Compliance, Revenue Metrics
- Auto Score: Readiness %, Weak Areas, Recommended Actions
- Business Diagnostic Engine with 8 sections (Strategy, Finance, Marketing, HR, Tech, Legal, Ops, Sales)
- Output: Overall Score, Risk Score, Growth Score, Investment Score, Recommendations

Database Tables

- BusinessAssessments
- AssessmentAnswers
- ReadinessScores

Additional Notes

This module powers both the Diagnostic Engine and the Venture Readiness checklist.

Module 5: Advisory Module (Basic)

Objective

Enable booking, assignment, and tracking of advisors with milestone reporting.

Features

- Book advisors by expertise and availability
- Assign advisors to founders/MSMEs
- Meeting scheduling and notes

- Milestone and task tracking
- Progress reports and recommendations
- Timeline view

Database Tables

- Advisors
 - Meetings
 - Tasks
 - Reports
 - Recommendations
 - Progress
-

Module 6: Document Management

Objective

Securely upload, store, version, and share documents across modules.

Features

- Version control for document updates
- Approval workflows for document review
- Expiry alerts for time-sensitive documents
- Digital signatures (future)
- Role-based sharing and permissions
- Access control per user role

Database Tables

- Documents
- DocumentVersions
- DocumentApprovals

Additional Notes

Folder structure: Financial Statements, GST, Incorporation, Cap Table, Legal, Patents, Bank Statements, Business Plan, Pitch Deck.

Module 7: Admin Dashboard (Basic)

Objective

Centralized control panel for platform administrators to manage core operations.

Features

- User management (view, edit, suspend, delete)
- Revenue overview
- Assessment tracking
- Event management
- Partner oversight
- Investor database view
- Basic analytics

Additional Notes

Phase 1 admin dashboard focuses on MVP modules. Advanced features added in Phase 3.

Module 8: Notifications (Email)

Objective

Send timely email notifications for key platform events.

Features

- Consultation booked → confirmation + admin alert
- Lead received → sales team notification
- Partner approved → welcome email
- Event registration → confirmation + reminder
- Fundraising milestone → status update
- Assessment completed → report ready

Database Tables

- Notifications

Additional Notes

Future: SMS, WhatsApp, Push, In-app notifications (Phase 2+).

PHASE 2

Ecosystem Expansion — Fundraising, Investor CRM, Events, Knowledge, Tasks, CRM

Module 9: Fundraising Support

Objective

Support fundraising preparation and investor introductions (not an investment platform).

Features

- Funding goal and stage tracking
- Investor preference configuration
- Pitch deck upload and versioning
- Financial model upload
- Data room management
- Investor introduction requests
- Communication tracking

Database Tables

- FundraisingProjects
- Documents
- DataRoomFolders
- InvestorIntroductions

Additional Notes

Important: This is a support module only. Antara Global does not guarantee funding.

Module 10: Investor CRM (Basic)

Objective

Manage investor database with preferences, portfolio tracking, and communication logs.

Features

- Investor registration and profile management
- Sector, ticket size, location, stage preference
- Portfolio company tracking

- Status and engagement tracking
- Communication log

Database Tables

- Investors
 - InvestorProfiles
 - PortfolioCompanies
 - CommunicationLogs
-

Module 11: Events Module

Objective

Schedule, promote, and manage workshops, bootcamps, webinars, panels, and networking events.

Features

- Event creation with speaker and description
- Registration form and attendee management
- Attendance tracking
- Certificate generation
- Feedback collection

Database Tables

- Events
- EventRegistrations
- EventFeedback

Additional Notes

Event types: Workshops, Bootcamps, Webinars, Panels, Networking Events.

Module 12: Knowledge Hub

Objective

Manage educational content, resources, and learning materials via CMS.

Features

- Articles, videos, templates, guides
- Funding resources and government scheme info
- Financial literacy content
- CMS-driven content management
- Category and tag management
- Search and filter

Database Tables

- KnowledgeArticles
- Resources
- Categories

Additional Notes

Categories: Articles, Videos, Templates, Guides, Funding Resources, Government Schemes, Financial Literacy.

Module 13: Task Management

Objective

Create, assign, and track tasks across projects and milestones.

Features

- Task creation with deadlines
- Project and milestone grouping
- Comments and attachments
- Assignee and status tracking
- Progress updates

Database Tables

- Tasks
 - Projects
 - Milestones
-

Module 14: CRM (Leads)

Objective

Track all inbound leads, prospects, clients, and communications.

Features

- Lead capture from all website forms
- Prospect and client pipeline
- Startup, investor, partner classification
- Meeting and call logging
- Email and follow-up tracking

Database Tables

- CRMLeads
 - LeadSources
 - LeadTags
 - Communications
-

PHASE 3

Advanced Platform — Partners, Capital Connectivity, Payments, Analytics, Advanced Admin, AI

Module 15: Partner Network

Objective

Onboard and manage ecosystem partners with agreements and ratings.

Features

- Partner onboarding (CA, CS, Law Firm, Consultant, Incubator, Accelerator, NBFC, VC, Angel Network)
- Service catalog management
- Agreement and contract management
- Ratings and reviews
- Availability scheduling

Database Tables

- Partners
 - PartnerCategories
 - PartnerAgreements
 - PartnerRatings
-

Module 16: Capital Connectivity

Objective

Facilitate warm introductions between founders and investors through admin/advisory review.

Features

- Founder requests introduction
- Admin reviews request
- Advisor reviews fit
- Suitable investor selected
- Warm introduction facilitated
- Status tracking

Database Tables

- CapitalConnectRequests
- InvestorIntroductions
- IntroductionStatusLogs

Additional Notes

Not automated matching. Human-reviewed warm introductions only.

Module 17: Payments

Objective

Handle payments for consultations, assessments, events, memberships, and subscriptions.

Features

- Payment gateway integration (Razorpay / Stripe)
- Invoice generation
- Refund processing
- Subscription management
- Payment history

Database Tables

- Payments
 - Invoices
 - Subscriptions
-

Module 18: Analytics

Objective

Comprehensive business intelligence with charts and exportable reports.

Features

- Industry-wise analysis
- Funding stage distribution
- Assessment score trends
- Revenue analytics

- User growth metrics
- Event performance
- Investor activity tracking

Database Tables

- AnalyticsEvents
 - UserActivityLogs
 - Reports
-

Module 19: Advanced Admin Features

Objective

Extended admin capabilities for workflow automation, custom reports, and permission management.

Features

- Advanced CRM with pipeline view
 - Workflow automation engine
 - Custom report builder
 - Dynamic permissions management
 - Audit log viewer
 - System configuration
-

Module 20: AI Modules

Objective

AI-powered tools to enhance platform intelligence and user experience.

Features

- AI Business Health Analyzer
- AI Financial Readiness Score
- AI Pitch Deck Review
- AI Business Plan Review
- AI Compliance Reminder
- AI Meeting Summaries
- AI Founder Assistant

- AI Knowledge Search (RAG)
- AI Growth Suggestions

Additional Notes

AI Investor Fit Recommendation is advisor-assisted (not automated). All AI features are optional enhancements.

Supplementary Systems

Business Diagnostic Engine

Questionnaire covering 8 sections:

- Strategy
- Finance
- Marketing
- HR
- Technology
- Legal
- Operations
- Sales

Output: Overall Score, Risk Score, Growth Score, Investment Score, Readiness Score, Recommendations

Data Room

Folder structure with role-based access:

- Financial Statements
- GST
- Incorporation
- Cap Table
- Legal
- Patents
- Bank Statements
- Business Plan
- Pitch Deck

Access: Founder, Admin, Advisor, Investor (Permission Based)

Workflow Engine

API Integrations

- Razorpay
 - Stripe
 - Google Calendar
 - Zoom
 - Google Meet
 - DocuSign
 - MS Teams
 - LinkedIn
 - GST Verification
 - PAN Verification
 - MCA Verification
 - Email (SES/SendGrid)
 - SMS (MSG91/Twilio)
 - WhatsApp Business API
-

Audit Logs

Track all critical events:

- Logins
 - Profile Changes
 - Document Uploads
 - Approvals
 - Payments
 - Admin Activities
-

Helpdesk

- Tickets
- FAQs

- Live Chat
 - Knowledge Base
-

CMS

Manage all frontend content:

- Homepage
 - About
 - Services
 - Events
 - Blogs
 - Knowledge Hub
 - Partners
 - Team
 - Testimonials
 - Contact
 - SEO
-

Database Overview

Complete list of core tables:

- Users, Roles, Permissions
 - Founder, Startup, MSME
 - BusinessAssessments, AssessmentAnswers
 - Advisors, Meetings
 - Investors, InvestorIntroductions
 - Partners
 - KnowledgeArticles, Events, Registrations
 - Tasks, Documents
 - Payments, Notifications, Reports
 - AuditLogs, CRMLeads, SupportTickets
-
